Linta Antony

Phone No: (480) 788-0416
Email ID: lintaa0757@gmail.com

PROFESSIONAL SUMMARY:

- About **5+ years** of experience in a corporate environment as a **Web UI / Front End developer.**
- Experience in all phases of **Software Development Life Cycle (SDLC).**
- Expertise in working with the **JavaScript, Prototype.js, HTML5, XHTML, XML, CSS3, jQuery, AJAX, JSON** and various **MVC JavaScript frameworks Angular 10/9/8/7/6/5/4/2, backbone.js, Express.js, Ext.js** and **Node.js**.
- Experience in developing Single Page Applications using **Angular, Angular Material, Bootstrap, Typescript, CSS3**.
- Hands on experience in **Angular** frameworks and **Angular CLI,** gained strong understanding over the application flow among various modules, components along with routing, services, filters and directives.
- Hands - on experience in developing Web Applications/Pages using **HTML (4/5), CSS (2/3), JavaScript, jQuery, AJAX, XML, twitter Bootstrap, JSON, Angular 1.x 1.5 1.6, Angular 2/4, Node.js, Express JS,D3.js,React.js, Redux, Require.js, Java/J2EE, Media Queries, CSS Frameworks, Java, JSP, Media Queries, Github, RESTful programming**.
- Strong Experience in dealing with **CSS3 Animations, Backgrounds, Layouts, Positioning, Text, Border, Padding, Margin, Table, Sprites, Behaviors, Pseudo Classes, Pseudo Elements** and **CSS3 Box Model.**
- Proficiency with various design tools such as **Adobe Photoshop, Illustrator, Flash**.
- Good knowledge in developing and designing **Web 3.0** application according to Information architecture and Usability standards using **JavaScript framework, Ajax, JQuery, Java, XML, HTML5, CSS3, Bootstrap, Angular, REST APIs.**
- Experience as web developer with a strong background on open-source technologies, including **JSP, HTML5, CSS3, MySQL, JavaScript, Flash, Photo shop.**
- Expertise in Client Side designing and validations using **HTML5, XML, XSL** and **JavaScript** and in making web page cross browser compatible.
- Hands-on of experience in frontend/client-side world and have extensive expertise with React.js, Redux, Angular JS, Angular2/4, Bootstrap and most legacy frameworks and libraries such as jQuery.
- Proven experience developing consumer-focused web sites using **HTML5, CSS3, JQuery and JavaScript.**
- Experience in **CSS3** preprocessor **LESS** and **SASS** for dynamically styling Developed **HTML5** templates and performed client-side Validation using **JavaScript**
- Experience as database designing, maintaining and managing **MySQL** and **Oracle databases.** Extensive experience developing queries and procedures with **SQL, PL/SQL.**
- Proficient in using **PL/SQL** for developing complex stored procedures, Triggers, Tables, Views, User-Defined Functions, **SQL joins,** Index and query writing
- Proficiency in building responsive and mobile optimized websites using **Bootstrap.**
- Developed rich web user interfaces with **JSP, AJAX (asynchronous JavaScript & XML).**
- Involved in daily SCRUM meetings to keep track of the project status and expertise in **JIRA** and **Rally.**
- Good organizational and communication skills, with the ability to express technical concepts verbally and in written.

TECHNICAL SKILLS:

Web Technologies	JavaScript, HTML5, CSS3, Angular 2/4/5/6/7/8/9/10, Angular.js. Angular Material, Angular CLI, jQuery, Bootstrap, JSON, Node.js, React.js, Experss.js, Ext.js, Require.js, Grunt.js, Prototype.js

Languages	C, C++, JavaScript, TypeScript, SQL, PL/SQL
IDE's and Tools	Eclipse IDE, NetBean, Dreamweaver, FireBug, Developer Tools, EditPlus, JSfiddle, Webstrom, Tatastrom, Sublimetext
Methodologies	Test Driven Development (TDD), Agile, Waterfall
Wire Frame Tools	Adobe Illustrator CS3
Version Control	Git, CVS, SVN
Database	Oracle, DB2, MySQL, Mongo DB
Operating System	Windows, Mac, Unix, Linux

PROFESSIONAL EXPERIENCE:

Client: PNC Bank, Harrisburg, PA   **Sep 2021 - PRESENT**
Role: Web UI Developer
Responsibilities:
- Developed Angular factories to retrieve JSON data from the restful web service and displayed the response in the user interface pages.
- Worked with Angular framework 10/9/8 to build modern web applications that's include writing services, custom directives, controllers, filters, templates and other Angular Modules.
- Processed JSON data from RESTful web services by using Ajax to get resources from the database and populated data to the client side.
- Expertise in React JS framework to develop SPA.
- Created forms using Angular-material and used property and event binding to bind data to the form and performed patch update from the form inputs.
- Worked on improving performance of the web application using lazy loading and other angular latest features also helped in production support.
- Made use of Webpack as task runner to minify application and better performance to reduce loading time.
- Developed build and deployment scripts using MAVEN as build tool and automated the build and deploy processes.
- Used JavaScript and XML to update a portion of a Web page thus reducing bandwidth usage and load time and add modal dialog in web pages to get user input and requests.
- Used jQuery to traverse through a DOM tree and manipulated the nodes in the tree. Implemented the Drag and Drop functionality using jQuery framework.
- Experience in building application with React JS, Redux, Require JS, in MVC architecture.
- Used RxJS catch library and catch functions to handle error handling in Angular Application.
- Utilized NPM commands and worked on Package.json for managing dependencies and dev-dependencies of Node.js applications.
- Ensure delivery of high-quality work with monthly iteration, also involved in sprint planning and retrospectives – Agile methodology.
- Expertise in React.JS framework and integrate them to Node JS server side code.
- Responsible for creating efficient design and developing Application using HTML5, CSS3, Angular Material, Angular, NPM, Node.js, TypeScript.
- Made use of Angular new feature like Combining with Many Transitions Files this helped to merge many files on in just one go.
- Worked under Agile software development process and attended daily Scrum meeting.
- Designed dynamic and multi-browser compatible pages using HTML5, CSS3, JQuery, JavaScript and Angular.
- Worked on save search module using Angular, Used RESTFUL web services using Angular HTTP Module and transformed the response using RxJS observables.
- Used GIT for the simultaneous access to the code within the team members.
- Used JIRA as the bug tracking system to track and maintain the history of bugs/issues on everyday basis.

Environment: HTML5, CSS3, TypeScript, JavaScript, Angular 10/9/8, Angular CLI, Angular Material, Require.js, Ext.js, Backbone.js, Node.js, React.js, RxJS, NPM, JSON, AJAX, Webpack, GIT, Jira, Oracle, Windows.

Client: Cigna Health, Denver, CO   **Feb 2020 – Aug 2021**
Role: Front End Developer
Responsibilities:

- Implemented functionality using Angular, Typescript and ES6.
- Used Angular routing features to make the component independent.
- Effectively used CSS3 features and created multiple columns, borders, backgrounds and used SASS to maintain the code with snippets and the available libraries.
- Implemented Angular services to communicate with Express.js on the server-side in-order to perform CRUD operations on database.
- Used CSS3 Sprites to decrease the number of HTTP requests and load time of web pages.
- Created Images, Logos and Icons for web pages using Dreamweaver.
- Maintained Cross Browser compatibility & implement Responsive Design using Twitter Bootstrap.
- ECMAScript 6 use to support across browsers.
- Developed page layouts, Navigations and presented designs and concepts to client for review.
- Created and tested scripts using JQuery on various browsers Chrome, Firefox, Opera, Safari, IE, etc.
- Worked with architects & Developers to enhance application functionality and add new features.
- Extensive use of Angular Material framework to achieve RWD, i.e., make the portal compatible for various screen resolutions which are trending in the market today.
- Created various MongoDB collections and wrote services to store and retrieve user data from the application.
- As a UI Developer, assisting my team in developing two different Web-based applications and managed in developing various web pages of the ecommerce website.
- Involved in development of commonly used angular components across teams such as directives for grid, pagination, conditional validations etc.
- Developed and designed web pages using with HTML5, CSS3, Angular 7/6/5, Node.js and jQuery based on the w3 standards.
- Used Angular Life Cycle Hooks throughout the application for components.
- Designed UI screens using CSS3, Angular Framework and HTML5.
- Involved in User Interface (UI) and User Experience (UX) design using HTML 5, XHTML, CSS3 and JavaScript and used Table less Design in CSS3 for positioning.
- Developed front end web applications using Grunt.js, LESS, Sass, and other front-end libraries and frameworks
- Used MEAN Stack Methodology to develop a dynamic website.
- Developed responsive designs using HTML5 and CSS3 for hand held devices.
- Involved in VIEW and CONTOLLER section of MVC pattern for CMS project, it includes HTML5, CSS3, JavaScript, jQuery and AJAX which were used for UI development.
- Created interface to manage user menu and Bulk update of Attributes using Angular, Bootstrap and jQuery.
- Analyzed recorded and modified client-server traffic using an HTTP monitor with SOAP
- Developed Chrome Apps using HTML5, CSS3 and JavaScript to extend the development capability.

Environment: HTML5, CSS3, JavaScript, Typescript, Angular 7/6/5, Angular Material, Grunt.js, Ext.js, Express.js, Node.js, React.js, Backbone.js, Bootstrap, jQuery, Dreamweaver, Mongo DB, Windows.

Client: Synnex, Fremont, CA   **Mar 2018 – Jan 2020**
Role: Web Developer
Responsibilities:

- Developed scalable applications using the MEAN (MongoDB+Express.js+Angular+Node.js) stack.
- Created Template Driven Forms and Reactive Forms in Angular.
- Implemented Services to share logic across different components in Angular.
- Working with Angular modules, classes, components and templates.
- Experience in working with Sass as a preprocessor to create CSS3 using mixins, nesting of selectors, variables etc.
- Written several reusable custom directives to perform DOM manipulations within different views of Single Page Application.
- Performed CRUD operation on restful web services using methods such as GET, PUT, POST and delete.
- Worked with JASMINE unit test framework to write unit tests for JavaScript code.
- Responsible to create Responsive Web Design using Twitter Bootstrap and Media Queries.
- Handled the status of the project in a timely manner in a clear and concise way.
- Extended CSS3 as needed to accommodate new data and display types.
- Used typescript as a superset for JavaScript with babel to make it compatible to older browsers.
- Development of the Web front end user interfaces with HTML/HTML5, DHTML, CSS/CSS3, SASS, and jasmine, JQuery, TypeScript, Angular 4/2, Bootstrap, DOM, XHTML, XML and JSON.
- Created Typescript reusable components and services to consume REST API's using Component based architecture provided by angular.
- Used Angular for DOM Manipulation, Filters, and Directives, routes using $scope object to create views using controllers.
- Extensive use of Angular Material framework to achieve RWD, i.e., make the portal compatible for various screen resolutions which are trending in the market today.
- Written services and factories, which contain reusable business logic, which were injected into controllers so the logic can be extracted and used with a restful web API.
- Performed authentication and authorization on a restful web Api service tier using json web token.

Environment: HTML5, CSS3, JavaScript, Typescript, Angular 4/2, Angular CLI, Angular Material, Backbone.js, Node.js, JQuery, AJAX, NPM, Dreamweaver, Photoshop, SQL, Oracle, Windows.
